Summary

AI Engineer with hands-on experience building production Generative AI and automation systems using Python, SQL, LLMs, Agentic AI, RAG, FastAPI, Supabase, n8n, and MCP. Experienced in designing AI workflows, multimodal applications, conversational systems, API integrations, and deploying internal products.

Experience

American Hairline Mumbai, India
AI Trainee – Full-time *Mar 2026 – Present*

- **Hair Visualizer:** Built a multimodal Generative AI system using OpenRouter and Gemini models to generate photorealistic hairstyle previews across four synchronized camera angles with visual grounding and model fallback.
- **Employee Knowledge OS:** Architected an agentic knowledge-extraction platform using Next.js, Supabase, OpenRouter, and Deepgram to systematically capture operational workflows and synthesize detailed SOPs.
- **Meeting Assistant:** Developed an AI meeting intelligence system using AssemblyAI and OpenRouter with long-transcript chunking, parallel LLM processing, action-item extraction, and WhatsApp delivery; deployed on a Webyne VPS.
- **WhatsApp Order Bot:** Built an 80-node n8n conversational workflow integrating WAHA, Deepgram, LLaMA 3.1, Google Sheets, Google Drive, and automated HTML-to-PDF order generation.
- Implemented internal automation and data integrations using **MCP, Google Apps Script, Service Accounts, Google Sheets, Google Drive, Firebase, and Supabase**.

Arkham Archives Remote
AI Developer Intern *Jun 2025 – Sep 2025*

- Built LLM-powered chatbot systems using Hugging Face Transformers for automated query resolution and customer-support workflows.
- Engineered prompt optimization strategies to improve contextual relevance and response consistency across multi-turn conversations.

Projects

FraudGuard AI (Financial Scam Detector) | *XGBoost, XLM-RoBERTa, FastAPI, React, Python* Capstone Project

- Developed a multilingual machine learning system using XGBoost and XLM-RoBERTa to detect financial scams and Ponzi schemes from social-media content.
- Built an end-to-end FastAPI and React application, achieving 93% accuracy and evaluating model performance with confusion matrices and ROC curves.

AI Resume Architect | *Gemini API, Streamlit, LaTeX, Python* Dec 2025 – Jan 2026

- Built a Generative AI ATS optimization tool using Gemini API to tailor resumes against target job descriptions and improve keyword alignment.
- Automated professional PDF and DOCX resume generation using LaTeX templates and Python-based document workflows.

TreeSense Imaging | *YOLOv8, Computer Vision, Streamlit, Python* Sep 2025 – Oct 2025

- Trained a YOLOv8 computer-vision model to detect and count trees from aerial imagery with green-cover and vegetation-density analysis.
- Built an interactive Streamlit dashboard and applied pathfinding algorithms for route analysis across detected regions.

Technical Skills

Languages: Python, SQL, JavaScript, Google Apps Script

AI/ML: Machine Learning, Deep Learning, NLP, Computer Vision, LLMs, RAG, Agentic AI, Prompt Engineering, Embeddings, Scikit-learn, TensorFlow, YOLOv8, XGBoost

Generative AI: LangChain, LangGraph, OpenRouter, Gemini, Hugging Face, MCP

Backend/Web: FastAPI, Flask, REST APIs, React, Next.js, Streamlit

Data/Databases: PostgreSQL, Supabase, Firebase, Google Sheets, Pandas, NumPy

Automation/APIs: n8n, WAHA, Deepgram, AssemblyAI

Deployment/Tools: AWS, Docker, Git, GitHub, Vercel, Webyne VPS

Education

ALDEL Institute's St. John's College of Engineering and Management Mumbai, India
Bachelor of Technology – Artificial Intelligence & Machine Learning *Nov 2022 – Jun 2026*

- CGPA: 7.68 / 10
